DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,3,10,12 rejected under 35 U.S.C. 102(b) as being anticipated by Siedler-6,454,640.

Siedler discloses a hand-held sanding device having a bottom plate with dust apertures, dust collection channels, fan, and motor for rotating fan to pull dust through the channels, apertures into the a vacuum manifold and expelling air; wherein the vacuum manifold is made up by the bottom plate, top surface, side walls and a central aperture.

3. Claims 1,10 rejected under 35 U.S.C. 102(b) as being anticipated by Oda et al.-6,447,383.

Oda discloses a hand-held sanding device having a bottom plate with dust apertures, dust collection channels, fan, and motor for rotating fan to pull dust through the channels, apertures into the a vacuum manifold and expelling air.

Claim Rejections - 35 USC § 103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4,5,11,13,18-29rejected under 35 U.S.C. 103(a) as being unpatentable over Seidler in view of Dicke-4,527,360.

Seidler does not disclose the sander being a linear sander. However, Dicke teaches the use of a dust collecting sander having linear movement. Therefore, it would

have been obvious to one of ordinary skill in the art at time invention was made to use a linear movement sanding device, as taught by Dicke, in order to sand corners and straight edges.

5. Claims 2,11,18 rejected under 35 U.S.C. 103(a) as being unpatentable over Oda in view of Dicke-4,527,360.

Oda does not disclose the sander being a linear sander. However, Dicke teaches the use of a dust collecting sander having linear movement. Therefore, it would have been obvious to one of ordinary skill in the art at time invention was made to use a linear movement sanding device, as taught by Dicke, in order to sand corners and straight edges.

Allowable Subject Matter

6. Claims 6-9, 15-17 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
